Senior Node JS (TypeScript, JavaScript) Engineer

Summary

I have in total ~15 years of experience in web programming

- Deep understanding of cloud platforms like AWS and GCP
- Utilized typescript-based backend, RESTful API, TypeOrm, FireOrm, Mongoose, Typegoose
- Micro-service architecture solutions
- JS frontend frameworks: Angular, React, Vue, Gatsby
- Backend Frameworks: Nest JS, Express JS. (4 years experience with NEST JS framework)
- Broadcasting, I-Gaming, real-time mobile apps, e-commerce, social media
- Managing a scrum team as a lead, mentoring developers [junior - seniors levels]
- Expert expertise in backend development. Deep dive into web-frontend

Competence

Methodologies:	TDD, BDD, DDD, scrum, agile
Technologies:	Node JS, Nest JS, React JS, Express JS, GraphQL, Bootstrap, Angular JS, Vue JS, Gatsby, TypeORM
Programming lang:	TypeScript, JavaScript, PHP, GoLang, Python
DB:	PostgreSQL, MySQL, MongoDB, Firebase, Redis, DynamoDB, Memcached
Tools:	VSC, WebStorm, Postman, Gitlab, GitHub, SourceTree
Clouds and platforms:	AWS, GCP, Heroku, Vagrant, Docker, Kubernetes, Terraform
Operating Systems:	Mac OS, Linux, Windows

Experience

Apr 2021 - May 2023

Company: Twizted Design (New York, remote)
Position: Senior Node JS (Typescript, Javascript) Engineer

Technologies: Node JS, TypeScript, JavaScript, Github actions, AWS, Heroku, Redis, Grafana, Nest JS, Angular JS, MongoDB

Subject: My responsibility involved implementing a scalable REST API using TypeScript, conducted JEST e2e tests, and set up basic DEV-OPS and a CI/CD pipeline using GitHub Actions. The project also involved AngularJS frontend development and extensive refactoring from native JavaScript to TypeScript.

Achievements:

1. Improved system performance, reduced error rates
2. Received positive feedback from end-users
3. Improved code documentation
4. Improved code maintainability, readability, and efficiency with strict types and benefits given by TypeScript
5. Improved performance and scalability both of code and cloud instances

Main Project: Videoflow (<https://videoflow.io>)

Sep 2020 - April 2021

Company: Addressya AB (Stockholm, Sweden, remote)
Position: Senior Node JS (Typescript, Javascript) Engineer

Technologies: Node JS, TypeScript, JavaScript, GCP, Firebase, BigQuery, React Native

Activity: REST API, Cloud functions, Firebase, GCP, React Native

- provided a Firestore migration workflow
- provided refactoring workflow
- mentoring and presentations
- research the app algorithms
- sprint planning

Subject: This is an experience to scale the Node JS based REST API on Firebase serverless architecture, implemented a list of 3rd party integrations, had a risk management responsibilities and typescript integrations for the backend part

Main Project: **Addressya** (mobile IOS, Android: <https://addressya.com>)

Nov 2019 – July 2020

Company: **Betinvest Ltd** (Kyiv/London, remote)

Position: Senior Node JS (Typescript, Javascript) Engineer

Technologies: Node JS, TypeScript, JavaScript, GitLab, Nest JS, React JS, Rabbit MQ, Web Sockets

Subject: Led the team in making key architectural decisions that significantly contributed to the scalability and maintainability of the CMS platform and back office for casino games. Implemented Node JS based REST API, React JS client interface, TypeScript based backend

Achievements:

1. Auto-scalable, RabbitMQ based event-sourcing microservice architecture
2. Established and enforced robust coding standards across the development team, fostering a culture of consistency and high-quality code. Conducted regular code reviews to ensure adherence to standards
3. Received positive feedback and recognition from stakeholders for making sound architectural decisions, maintaining high coding standards, and achieving notable performance improvements. This contributed to the overall success of the project
4. Collaborated with cross-functional teams to address complex architectural challenges, fostering an environment of knowledge sharing and problem-solving. Successfully resolved the bottlenecks and all of the specification details

Main Project: CMS for sports book, Back office (<https://www.betinvest.com>)

Dec 2018 – Nov 2019

Company: **Noisy Miner** (Kyiv, on-site)

Position: Senior Node JS (Typescript, Javascript) Engineer

Technologies: Node JS, TypeScript, Web Sockets, BigQuery, Realtime DB, Firebase, Firestore, FireORM, Web Hooks

Subject: This encompasses the development of a Node.js-based REST API using TypeScript and Express.js, adopting a microservice architecture on Google Cloud Platform (GCP) with integration to BigQuery and key-value storages. Comprehensive E2E and unit tests were implemented to ensure thorough coverage.

Achievements:

1. Implemented a new version of DB model using TypeScript.
2. Provided a BigData migration script to transfer the data from Realtime key-value storage to more extended version of Firebase serverless platform named Firestore
3. Escaped bottlenecks with database requests and manage data limitations effectively consider the strategies provided by Firestore key-value storage, new TypeScript based DB queries and web-hooks between Firestore and BigQuery

Main Project: Clawee (Tel Aviv, <https://clawee.com>)

Oct 2017 – Sep 2018

Company: **Edvantis** (Poland, on-site)

Position: Senior PHP, Node JS Engineer

Main Project: BigCommerce (San Francisco, <https://www.bigcommerce.com>)

Activity: Full stack engineer as a member of an international team developing an enterprise e-commerce web application.

- Tech-lead responsibilities
- Onboarding new team-mates
- Architecture solutions due to the platform

Technologies: Node JS, PHP, Ruby, Travis, PHPUnit, Angular, Mongo, MySQL, GCP, Microservices, Circle CI, Redis

May 2016 – Oct 2017

Company: **TireConnect** (Kyiv, on-site)

Position: Senior PHP | JavaScript (Full Stack) Software Engineer

Activity: REST and SOAP services

Kostiantyn Baidush

Feb 2014 – Jan 2016

Company: **Software Mackiev** (Boston/ Kyiv office, on-site)
Position: Senior PHP | JavaScript (Full Stack) Software Engineer
Activity: Senior engineer, web app development from scratch

Apr 2011 – Jan 2014

Company: **Platinum Bank** (Kyiv, on-site)
Position: PHP | JavaScript Software Engineer
Activity: Development of internal CRM

Dec 2010 – Aug 2011

Company: **Otpusk** (Kyiv, on-site)
Position: PHP | JavaScript Software Engineer
Activity: Web-based CRM system and portal has registered and hosted customer data

Sep 2008 – Dec 2010

Company: **Digital Ventures** (Kyiv, on-site)
Position: PHP | JavaScript Software Engineer
Activity: The development of a scalable Internet portal

Education

Sep 2007 – Jun 2008

University: **Kremenchuk Mykhailo Ostrohradskyi National University**
Url: www.kdu.edu.ua

Degree: M.Sc. degree in Computer Science (awarded on June 2008)

Diploma Thesis: **Abstract:** The application provides an automation software storage administration as a part of the company environment

Sep 2003 – Jun 2007

University: **Kremenchuk Mykhailo Ostrohradskyi National University**
Degree: B.Sc. degree in Computer Systems and Networking

Certification

Aug 2012 – Jan 2018

Speak Up Language School Kyiv – English, C1 Advanced

Sep 2014 – Dec 2014

JUJA Online Courses – OOP, Design Patterns

Sep 2019 – Oct 2019

Coursera: Google Cloud Platform Fundamentals

Languages

English: C1 Certified, **Polish:** B1, **Ukrainian, Russian:** Native

Interests

Music (drummer), traveling, gym, running

Date: Dec 1, 2023
